

Ready for **5G** Technology

With the coming generation of 5G technology, there will be explosive growth over the volume of data.

Driven by the characteristics of higher transmission, lower latency, and massive connectivity, the development of Multi-access Edge Computing and accelerated IoT platforms adopt faster data transfer speed and larger capacity for storage and memory modules to handle data more efficiently.

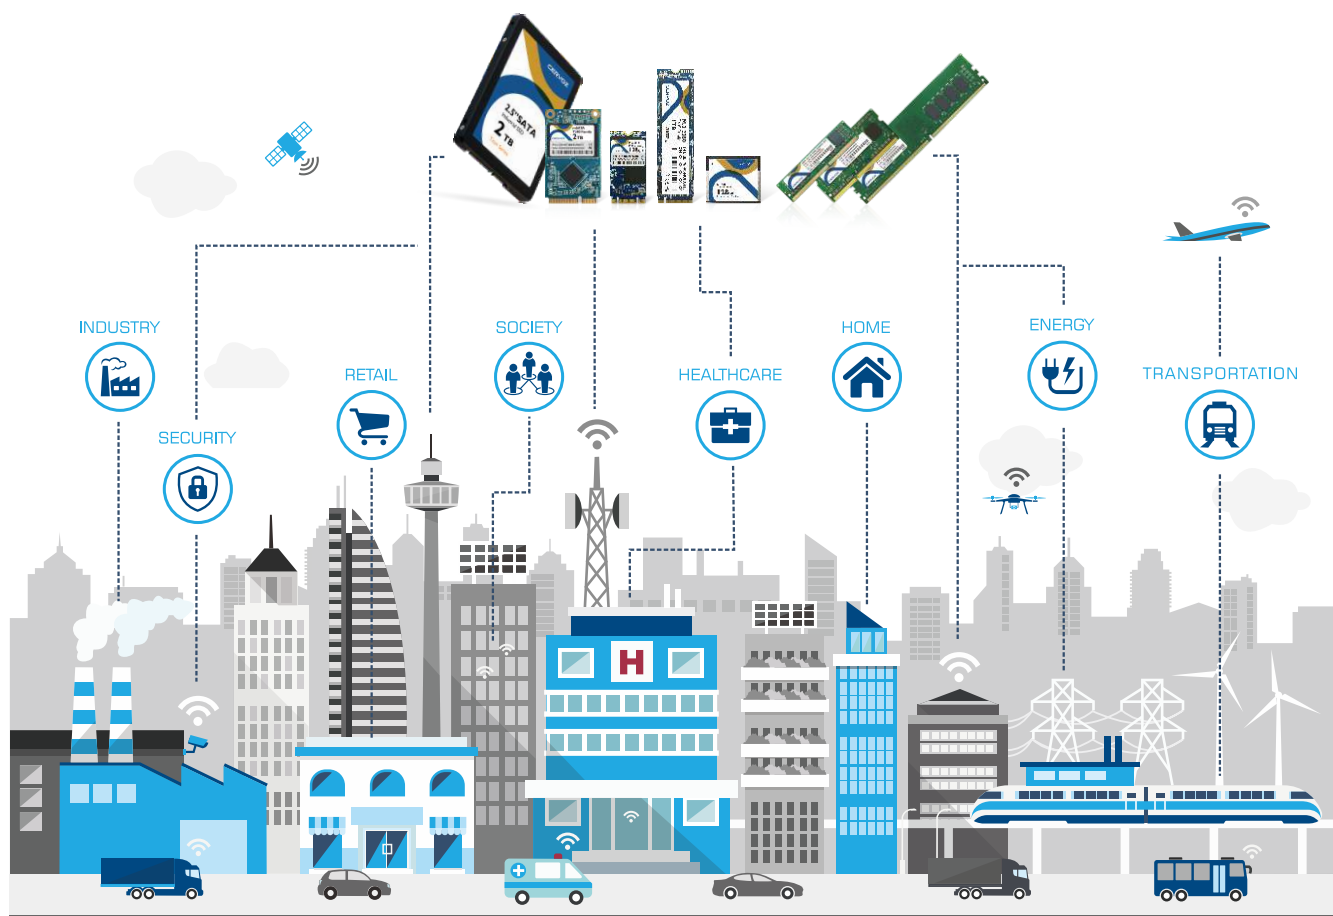

M.2 NVMe SSD

Heatsink Kit for M.2 2280

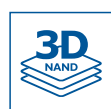

DDR4-2666 32GB

FEATURES

M.2 2242 | 2280 NVMe SSD

Industrial-Grade
3D TLC NAND

High IOPS

End-to-End
Data Protection

Built-in
Thermal Sensor

DDR4-2666 32GB DRAM Module

High-Capacity

High Performance
(11% higher than DDR4 2400MHz)

Lower
Power Consumption
